# COPPER CLEAN®

"Our return to campus plan includes layers of protection to help keep our community safe"

**SFU is recognized as a leader** in innovation and prioritizes solving societal challenges through innovation and entrepreneurship. Part of SFU's 2021 Safety Plan was the professional installation of **Copper Clean® Antimicrobial Patches** on more than 1,200 touch points across their campuses to protect their more than 30,000 students from transferring harmful microorganisms to shared surfaces. SFU has added their name to the list of schools and universities who have taken this level of protection for their students and guests.

## SFU Project Scope

---

**Copper Clean® Lever Handle Patch - Classroom Doors**

---

**Copper Clean® Large Surface Patch - Pull Bars**

---

**Copper Clean® Surface Patch 16 - Exterior Pull Doors**

---

**Copper Clean® Elevator Patch - Elevator Button Covers**

**1,200  
SELF-SANITIZING  
SURFACES ON  
SFU CAMPUSES**

## DURABLE DESIGN EFFECTIVE FORMULA

Simon Fraser University is a top ranked Canadian university known for its progressive innovation and appealing building architecture. SFU contacted Coptek, the Canadian distributor of Copper Clean, to outfit their three campuses with **Copper Clean® Antimicrobial Patches** on more than one thousand surfaces the students will be sharing through the course of this academic year.

SFU opted for Coptek to provide professional installation to guarantee the effectiveness and aesthetic appeal Copper Clean offers to a facility. These patches will continue to be quality controlled and replaced when necessary.

**Copper Clean® Antimicrobial** surfaces deliver continuous and ongoing antibacterial action, remaining effective in killing greater than 99.9% of bacteria. The Environmental Protection Agency (EPA) is announcing that certain copper alloys provide long-term effectiveness against viruses, including SARS-CoV-2, the virus that causes COVID-19.

## Universities have an obligation to their students

**Copper Clean® Antimicrobial Patches** are the only EPA and PMRA certified self-sanitizing surfaces on the market. The investment individuals make into education should be equally met with care and concern from the institution.
